

NITIKA DAHAL

Computer Science Student · Cybersecurity & Web Development

Kathmandu, Nepal · nitikadahal15@gmail.com · +977 981-8899742 · [LinkedIn](#)

PROFILE

Bachelor of Computer Science (Hons) student at Texas College of Management & IT with a strong foundation in programming, networking, and cybersecurity. Hands-on experience with Python, C, HTML/CSS/JavaScript, Linux administration, and Cisco network design. Passionate about ethical hacking, web security, and building practical, user-focused software. Seeking internship and collaboration opportunities in IT and cybersecurity.

EDUCATION

BCS (Bachelor of Computer Science), Hons

2024 – Present

Texas College of Management & IT (Lincoln University) · Sifal, Kathmandu

+2 (National Examination Board)

2022 – 2024

Texas International College · Mitrapark, Kathmandu

SEE (National Examination Board)

2022

International Joseph Public School · Kapan, Kathmandu

TECHNICAL SKILLS

- Programming & Web: Python, C, HTML, CSS, JavaScript
- Systems & Networking: Linux administration, Cisco Packet Tracer (routing, switching, VLANs)
- Platforms & Tools: WordPress, cPanel hosting, Graphic Design fundamentals
- Security Focus Areas: Ethical hacking fundamentals, endpoint security, web security, IS audit, Active Directory (AD DS) security

PROJECTS

Personal Portfolio Website

- Designed and developed a responsive personal portfolio using HTML, CSS, and JavaScript.
- Showcased educational background, technical skills, certifications, and projects with a user-friendly, mobile-responsive layout.

Network Design & Simulation (Cisco Packet Tracer)

- Designed and configured small-scale enterprise networks, implementing IP addressing, routing, switching, and VLANs.
- Simulated real-world networking scenarios and analyzed network performance and troubleshooting.

Linux System Administration Lab

- Performed Linux system configuration, user management, and file permission tasks.
- Practiced package management, shell scripting, and basic server administration for improved system security.

Python-Based Student Management System

- Developed a console-based application in Python to manage student records, including add, update, search, and delete functionality.
- Applied core programming concepts and data-handling techniques.

Ethical Hacking & Security Assessment Labs

- Conducted vulnerability assessment and reconnaissance activities in a controlled lab environment.
- Applied networking and security concepts to identify potential weaknesses, gaining hands-on experience in security testing methodology.

WordPress Website Development

- Built and customized websites using WordPress and cPanel hosting, managing themes, plugins, and content.
- Developed practical understanding of website deployment and ongoing site management.

TRAINING & CERTIFICATIONS

Introduction to Ethical Hacking · Endpoint Security · Web Security · Linux for Beginners · IS Audit · AD DS Security
